

Abdulla Abdulrahman Y. AlBassam

Networks and Cybersecurity Student • abdulla.a.albassam@gmail.com • <https://abdullaalbassam.com> • +973 35357511 / +44 7767331975

EDUCATION

Northumbria University, Newcastle

Expected: July 2026

BSc (Honors), Networks and Cyber Security

Predicted: 1st Class Honours

Kings College London

June 2023

Foundation Year

Economics and Mathematics

Modern Knowledge Schools, Bahrain

May 2022

American High School Diploma

GPA: 98%

HONOURS AND AWARDS:

- **Emdad Scholarship Recipient | The Custodian of the Two Holy Mosques Scholarship Program | Sep 2022 – Sep 2026**
- **Innovation Award | Anthropic x Accenture Hackathon | May 2026**

PROFESSIONAL EXPERIENCE

IT Intern | Fundament SPC | Jun – Aug 2025

- Provided first-line support diagnosing and resolving hardware and connectivity issues and escalated when necessary.
- Assisted with basic IT hygiene tasks such as patching/updates, access role checks, and routine backup/restore checks to support operations.

TECHNICAL SKILLS

Languages and Scripting: Python, Bash, SQL, JavaScript/TypeScript, React (Native), PHP, HTML.

Virtualisation and Supplementary Tools: Docker, VMware, Git/GitHub, Microsoft Office (Word, PowerPoint, Excel).

Security and Networking: Wireshark, Burp Suite, Nmap, Metasploit, Snort, iptables, Hydra; GNS3, Cisco Packet Tracer, Kali Linux.

AI/ML: Jupyter, Google Colab, pandas, NumPy, scikit-learn; PyTorch/Transformers, Claude Code.

PROJECTS

Local Mail Server with Cascade AI Spam Filter | Bachelor's Dissertation | Sep 2025 – May 2026

- Built a secure local email system integrating baseline and advanced spam filters via a milter pipeline to evaluate robustness against adversarial attacks.

Enterprise Networking | Oct 2025 – Jan 2026

- Designed and simulated a multi-site enterprise WAN in GNS3 using an MPLS VPN core with dynamic routing, delivering site-to-site connectivity across multiple branch networks plus an additional direct VPN link between critical sites, with selective IPsec encryption applied to balance security and performance.

Penetration Testing and Defensive Security | Dec 2025 – Present

- Conducted vulnerability assessment of a VM and OWASP Juice Shop using tools such as Nmap, and Burp Suite. Reported findings, impact, and remediation.
- Implemented defensive controls (iptables rulesets, Snort IDS/IPS rules, OS hardening) and executed controlled credential testing with Hydra.
- Independently completed offensive security Capture The Flag challenges on TryHackMe including Windows/Linux exploitation, privilege escalation, web application attacks, and password cracking.

Digital Forensics Investigation | Feb 2025 – May 2025

- Obtained HDD images along with RAM dump images. Carried out a forensic examination of both devices to recover all relevant evidence and further understand the suspects motives, goals and objectives.
- Identified and evaluated findings from forensics investigations on FTK & Autopsy applying appropriate legal and procedural principles.

Computing Consultancy | Client Deliverable | Jan 2025 – May 2025

- Assessed a small business's security posture and delivered actionable vulnerability assessment in a client-facing consulting capacity.

System Architecture | Sep 2024 – Apr 2025

- Designed and implemented a secure, object-oriented REST API in PHP with an SQL database for a multi-platform academic conference system, following industry coding and security standards.

PASSION PROJECT

Sweaty: Video Game Social Platform | Oct 2025 – Present

- Building a mobile-first Letterboxd-for-games iOS/Android app to track what you're playing, rate games, write reviews and share your gaming journey. Full-stack TypeScript across a React Native client, a Next.js 16 web layer on Vercel, and Postgres handling auth, storage, real-time interactions and activity feed.
- Security as a focus: row-level security on every Postgres table, server-side session validation, HMAC-signed OAuth.
- Self-Audited the codebase, closing IDOR, PostgREST injection and email-enumeration vulnerabilities.

INDUSTRY CERTIFICATIONS

- Junior Penetration Tester (eJPT) – INE, *In progress*
- CCNA: Enterprise Networking, Security, and Automation – Cisco, Jan 2026
