

Abdulla Abdulrahman Y. Al Bassam

Computer Science Student • abdulla.a.albassam@gmail.com • <https://abdullaalbassam.com> • +973 35357511 / +44 7767331975

EDUCATION

Northumbria University, Newcastle

Expected: July 2026

BSc (Honors), Networks and Cyber Security

Predicted: 1st Class Honours

Kings College London

June 2023

Foundation Year

Economics and Mathematics

Modern Knowledge Schools, Bahrain

May 2022

American High School Diploma

GPA: 98%

HONOURS AND AWARDS:

"Emdad" Scholarship Recipient | The Custodian of the Two Holy Mosques Scholarship Program | Sep 2022 – Sep 2026

PROFESSIONAL EXPERIENCE

IT Intern | Fundament SPC | Jun – Aug 2025

- Provided first-line support diagnosing and resolving hardware and connectivity issues and escalated when necessary.
- Assisted with basic IT hygiene tasks such as patching/updates, access role checks, and routine backup/restore checks to support operations.

TECHNICAL SKILLS

Languages and Scripting: Python, Bash, SQL, JavaScript/TypeScript, PHP, HTML.

Virtualisation and Supplementary Tools: Docker, VMware, Git/GitHub.

Security and Networking: Wireshark, Burp Suite, Nmap, Metasploit, Splunk, Snort, iptables, Hydra; GNS3, Cisco Packet Tracer, Kali Linux.

DFIR and API tools: Autopsy, FTK Imager, Volatility 3, Postman.

AI/ML: Jupyter, Google Colab, pandas, NumPy, scikit-learn; Pytorch/Transformers, Agentic AI automation.

PROJECTS

Adversarially Robust ML-Based Spam Detection in Secure Mail Pipelines | Bachelor's Dissertation | Sep 2025 – Present

- Building a secure local email system integrating baseline and advanced spam filters via a mlter pipeline to evaluate robustness against adversarial attacks.

Enterprise Networking | Oct 2025 – Jan 2026

- Designed and simulated a multi-site enterprise WAN in GNS3 using an MPLS VPN core with dynamic routing, delivering site-to-site connectivity across multiple branch networks plus an additional direct VPN link between critical sites, with selective IPSec encryption applied only to sensitive subnets to balance security and performance.

Penetration Testing and Defensive Security | Jan 2026 – May 2026

- Conducted vulnerability assessment of a VM and OWASP Juice Shop using Nmap and Burp Suite, reported findings, impact, and remediation.
- Implemented defensive controls (iptables rulesets, Snort IDS/IPS rules, OS hardening) and executed controlled credential testing with Hydra.
- Independently completed offensive security Capture The Flag challenges on TryHackMe covering Windows/Linux exploitation, privilege escalation, web application attacks, and password cracking.

Digital Forensics Investigation | Feb 2025 – May 2025

- Obtained HDD images along with RAM dump images. Carried out a forensic examination of both devices to recover all relevant evidence and further understand the suspects motives, goals and objectives.
- Identified and evaluated findings from forensics investigations on FTK & Autopsy applying appropriate legal and procedural principles.

Computing Consultancy | Client Deliverable | Jan 2025 – May 2025

Assessed a small business's security posture and delivered actionable recommendations in a client-facing consulting capacity

System Architecture | Sep 2024 – Apr 2025

- Designed and implemented a secure, object-oriented REST API in PHP with an SQL database for a multi-platform academic conference system, following industry coding and security standards.

PERSONAL PROJECTS

Sweaty: Game Discovery and Social Tracking Platform for Gamers | Oct 2025 – Present

- Built a cross-platform iOS/Android mobile app with reviews, ratings, logs/diary, curated lists, and a real-time social/news feed using TypeScript and SQL.
- Developed full-stack features using React Native (Expo) + Supabase (Postgres, Auth/OAuth, Storage), including profiles and media uploads; deployed the landing page with Next.js on Vercel.
- Implemented AI-powered recommendations via the OpenAI API, plus game-library importing with performance improvements through caching, search optimisation, lazy loading, and image optimisation.

INDUSTRY CERTIFICATIONS

- Junior Penetration Tester (eJPT) – INE, *In progress*
- CCNA: Enterprise Networking, Security, and Automation – Cisco, Jan 2026
